## COLORBOND® Metallic steel

COLORBOND® Metallic steel has been developed by BlueScope Steel for the ultimate in beauty and flexibility of design. When you want to look your best, it's by far the best choice.

### Designing with the power of light

The distinctive reflective surface of COLORBOND® Metallic steel draws on the environment and surrounding structure, enabling you to enhance your prestigious building designs with subtle yet dramatic effects, endless nuances and dynamic changeable qualities. As light gently washes over the mica particles in the metallic finish, a unique perception of depth is achieved. In addition, the mica particles create a striking effect as the appearance of the

painted surface changes depending upon the lighting condition and viewing angle. Whether it's by using the variations between vertical and horizontal planes, creating distinctive architectural features, or even regulating the conditions of incidental lighting, the flexible nature of COLORBOND® Metallic steel will complement and enhance any design.

### The beauty of metallic. The durability of COLORBOND® steel

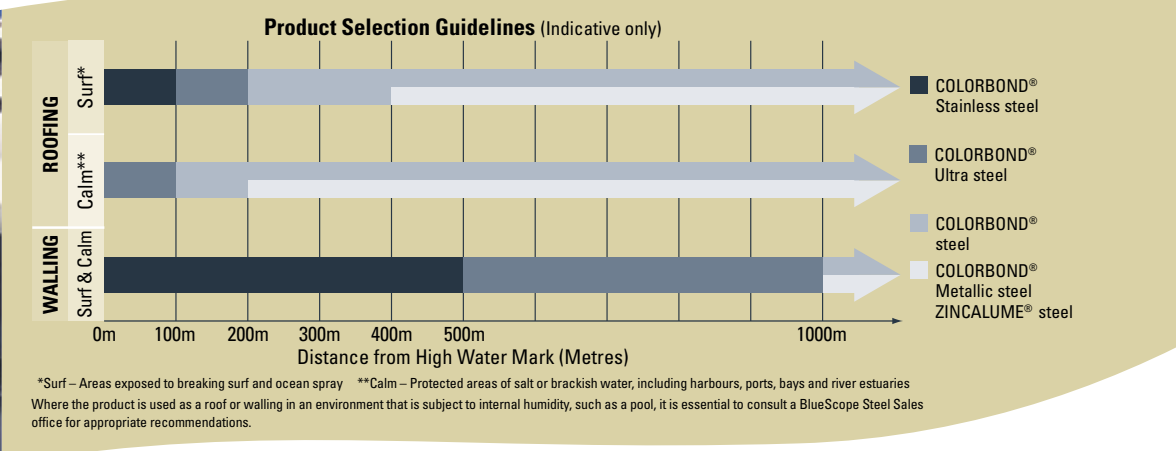

No longer does the aesthetic beauty of a building have to be compromised. The tonal spread of colours has been carefully selected to blend harmoniously with Australian environments, reflecting the strength and beauty of the surroundings. But COLORBOND® Metallic steel goes beyond

just exceptional aesthetics. Behind the colour qualities is the same tough and durable steel that Australian specifiers have come to rely on. COLORBOND® Metallic steel delivers lasting beauty to prestige building design.

### The right design choice for Australian conditions

When you specify COLORBOND® Metallic steel, you benefit not only from BlueScope Steel's decades of steel making expertise, but a BlueScope Steel warranty\* and a product carrying our brand name – your assurance of genuine Australian-made BlueScope Steel quality.

To determine the suitability of COLORBOND® Metallic steel for your project refer to the Product Selection Guidelines chart.
